

Make Your Own Cut-Out-and-Play Dinosaurs

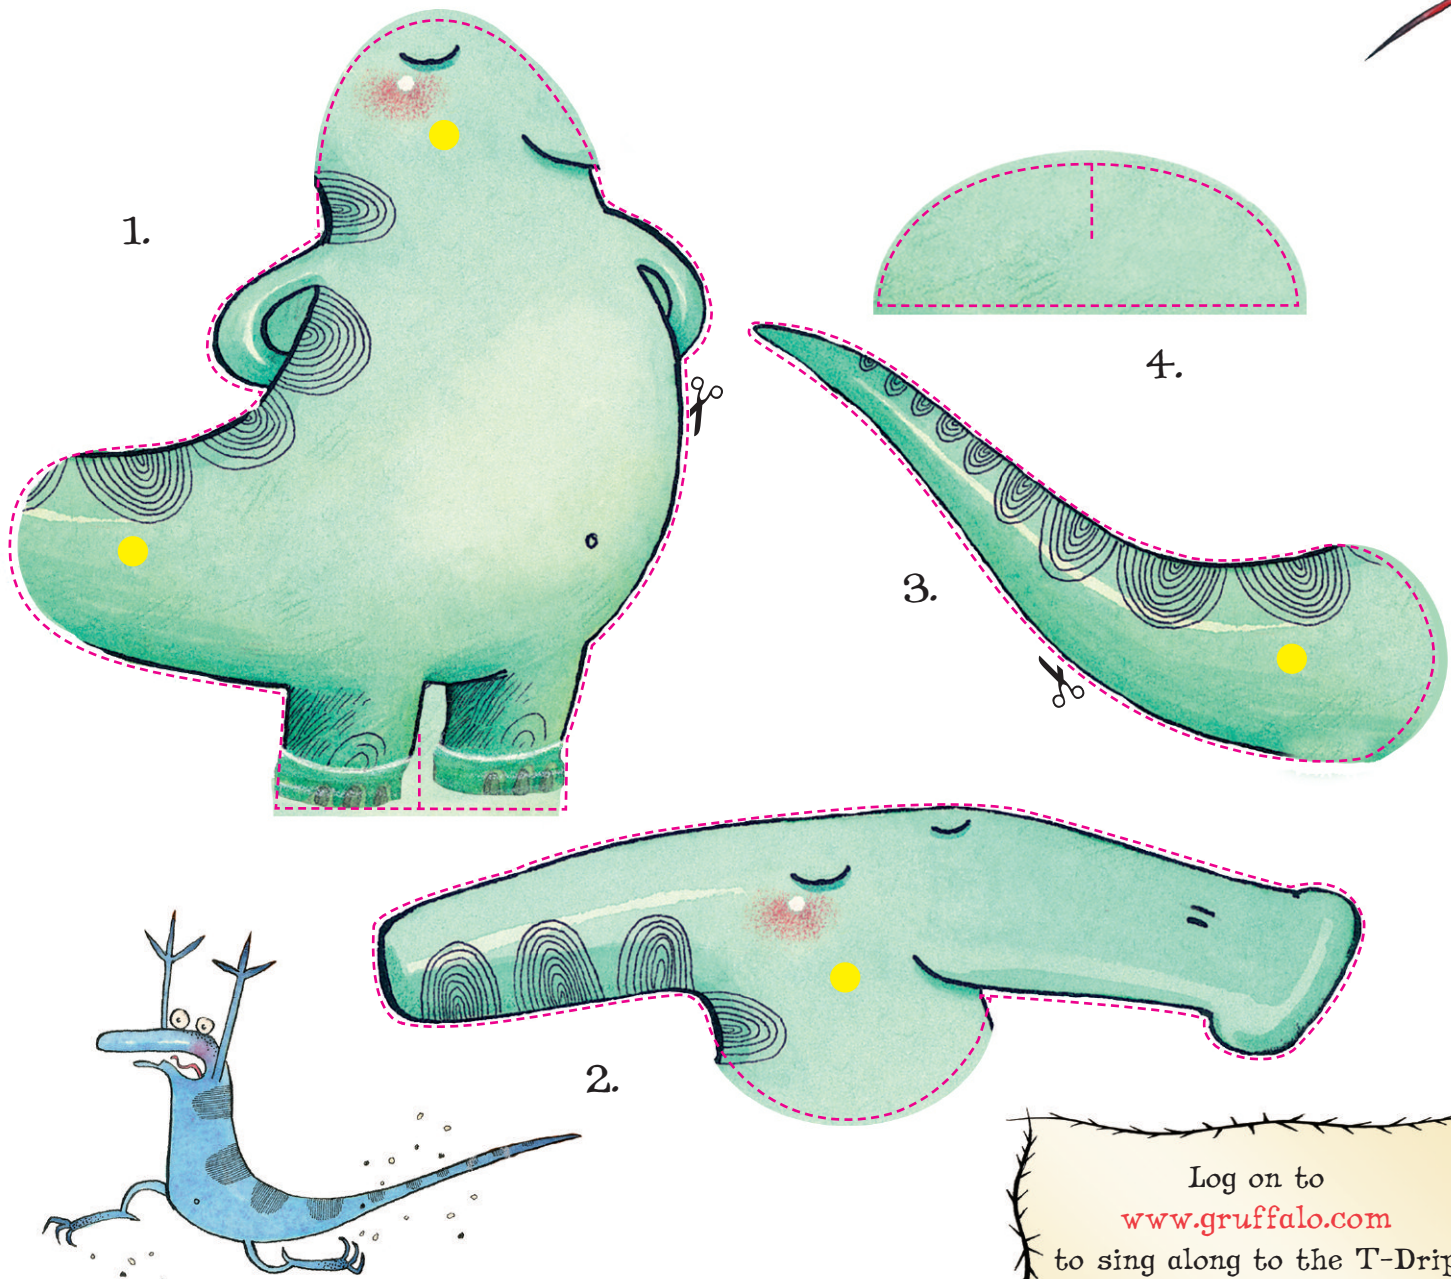

You will need: glue, card, scissors & 4 paper fasteners

First of all, glue both pages to some card so your cut-out-and-play dinosaurs will be stronger and last longer. With the help of an adult, carefully cut around all the dotted lines. Now you are ready to make your dinosaurs.

Let's make the T.rex first, so start with the four red pieces.

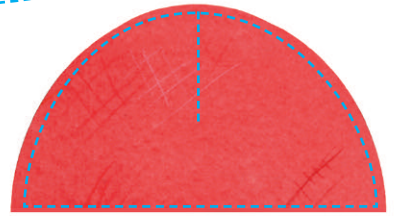

1. Ask an adult to help you pierce the yellow dot on piece 2 with a paper fastener.
2. Then, with the same paper fastener, pierce the yellow dot at the top of piece 1 and open out the back of the paper fastener to secure the dinosaur's head to the body. Now you have a biting T.rex head!
3. Now attach the T.rex's tail by piercing the yellow dot on piece 3 with another paper fastener, and then go through the second yellow dot on piece 1. Again, open out the back of the paper fastener to secure the tail.
3. Finally, slot piece 4 into the little slit at the bottom of the dinosaur to create a cross-stand so your dinosaur can stand up!

Now make T-drip in exactly the same way.
